Join us! Genomic Biomarkers Webinar for Clinicians

We invite you to join us for an upcoming webinar on **Thursday, August 13, 2026, at 3:00 PM ET** titled: **Genomic Biomarker Testing in Advanced Prostate Cancer: A Primer for Clinicians**

This free webinar will discuss recent developments and clinical evidence that have brought genomic biomarker testing to bear in advanced prostate cancer, and the implementation of these tests in this setting.

This session will also review the different genomic and biomarker tests available for advanced prostate cancer, what they test for, and how to help patients decide whether to pursue these tests.

New! Localized Prostate Cancer ECHO Series

Join the American Cancer Society's [Localized Prostate Cancer Treatment ECHO](#), an open-access program, with monthly sessions running from August 2026 to January 2027.

First session is on Tuesday, August 18th from 3:00 - 4:00 PM ET. [Register today!](#)

This ECHO will focus on discussing best practices for managing low-risk and/or localized prostate cancers including evidence-based care in the contexts of harm reduction, survivorship, treatment selection, shared decision-making, and patient support.

The target audience includes urologists, medical oncologists, and radiologists involved in the multidisciplinary management of patients with localized prostate cancer, as well as oncology nursing staff and patient navigation specialists.

In Case You Missed It

NCCN Prostate Cancer Early Detection Guidelines Update

The National Comprehensive Cancer Network (NCCN) recently released updated prostate cancer early detection guidelines. ACS is also in the process of reviewing our prostate cancer screening guidelines. Updates will be announced via future editions of this newsletter, the ACS NPCRT [LinkedIn page](#), and other official ACS channels.

Coming Soon

ACS NPCRT Risk Assessment and Screening Toolkit for Primary Care Clinicians

The ACS NPCRT is developing a digital toolkit to promote awareness of best practices around prostate cancer screening and to facilitate the adoption of those practices among healthcare systems and providers.

The toolkit will also help clinicians to identify patients who would benefit most from prostate cancer screening and will provide conversation guides to aid in the discussion of prostate cancer screening and follow-up testing options through an informed decision-making framework.

The toolkit will be released in early September—just in time for Prostate Cancer Awareness Month! Stay tuned to our [LinkedIn page](#) and our [website](#) for more updates as we prepare to launch the toolkit.

Stay Connected

Thank you for your ongoing dedication to the ACS National Prostate Cancer Roundtable. Your efforts are driving real progress for people affected by prostate cancer.

Questions? Ideas? Want to connect further? Email us anytime at npcrt@cancer.org. We're grateful for your partnership and look forward to what's ahead!

The American Cancer Society National Prostate Cancer Roundtable (ACS NPCRT) was established in 2024. The ACS NPCRT is a national coalition of 45 member organizations dedicated to improving prostate cancer outcomes and survivorship.

The American Cancer Society provides organizational leadership and expert staff support to the ACS NPCRT.
